GLOBUS

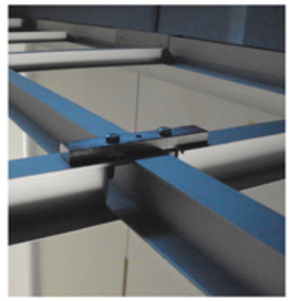
**Globus** was founded in 1995 under the title Aser Construction and Engineering. It completed numerous constructions successfully in various fields such as housing, industrial buildings and dockyards. After restructuring in 2006, **Globus** continues to operate under the umbrella of **Bozlu Holding**.

Working in collaboration with **Bozlu Holding** companies, **Globus** has successfully demonstrated the experience it has gained in the field of healthcare buildings, especially in designing radiation oncology, medical oncology and imaging centers, radionuclide and radiopharmaceutical production facilities and construction implementations.

**Globus** provides turnkey services in all phases of project and implementation processes, together with its expert solution partners. Architectural, structural, electrical and mechanical design, any construction, electrical and mechanical implementations from the excavation for the construction to the finishing works are among **Globus**'s fields of activity.

Closely following technological developments and applying them in its implementations as well as maintaining its dynamic structure, **Globus** also provides operations abroad. The young and professional team of **Globus** reflects its experience in engineering and architecture in every project undertaken.

Taking on reliability in the construction industry as a constant target, **Globus** has adopted fulfilling its commitments successfully and on time as a principle without compromising from its mentality of quality implementation and professional management.



**1** Eczacıbaşı-Monrol Radionuclide-Radiopharmaceutical Production Facility - YTÜ Technopark, İstanbul / design, implementation • **2** Eczacıbaşı-Monrol Radionuclide-Radiopharmaceutical Production Facility - Malatya / design, implementation • **3** Yasa Çamlıca Mansions / implementation • **4** Dockyard - Tuzla / implementation • **5** Eczacıbaşı-Monrol Radionuclide-Radiopharmaceutical Production Facility - Romania / design, project management • **6** Mongeri Binası / renovation implementation

Design, implementation, renovation in more than 100 completed projects for radiation oncology and imaging centers in Turkey.
Design, implementation, project management services for radionuclide-radiopharmaceutical production facilities in Turkey and abroad.
